

Dusting Mitt

Item #: Blue-308000, Green-308002 (Host Gift Only)

PROBLEM : Using popular spray cleaners to dust your home is not only expensive, but it also releases harmful aerosols into the air. Rub-on furniture polish may bring a luster to wood, but over time it can dull the finish, attract dust and create buildup. And the chemicals in some of these products may aggravate allergies—or worse.

SOLUTION : Dust without chemicals using the Norwex Dusting Mitt. It attracts dust like a magnet and even keeps it from resettling. Just slip it on and you're ready to go! The static electricity created as it passes over a surface allows it to quickly pick up dust from all surfaces, leaving your home cleaner so you can breathe easier.

Description:

The Dusting Mitt can be used wet or dry and is ideal for quick, chemical-free dusting throughout the house, including blinds, screens and other hard-to-clean areas. With its thick texture; dense, plush fibres and unique mitt design, the Dusting Mitt attracts and holds dust and allergens and won't let them go. BacLock™* in the cloth—our micro silver antibacterial agent—goes to work to self-purify and inhibit bacterial odours, mould and mildew growth within the mitt. Size: 26cm x 14cm / 10.24" x 5.51"

Key Features:

- Contains Norwex's exclusive BacLock™* agent
- Thick, plush fibres attract and hold dust for a long-lasting clean
- Can be used dry for dusting or wet for general cleaning
- Open spaces in the fibres created by the splitting process allow the mitt to lift away maximum dust and dirt.

Key Benefits:

- No need for waxy solutions that can dull furniture, or harsh chemicals that can harm your family's health

- Saves money by eliminating expensive dusting products and furniture polish
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products
- The ultra-soft and fine microfibre is woven into a higher pile for a more powerful static charge to attract and hold dust.
- Traps dust and grime in the mitt and leaves surfaces cleaner, so you won't have to clean as often.
- Used dry for dusting, it creates static electricity that lifts the smallest particles of dust and dirt up into the cloth and prevents them from resettling back onto surfaces.
- BacLock*, the micro silver agent in the cloth, goes to work with self-purification properties against mould, fungi and bacterial odour within 24 hours so that it is ready to use again.

How to Use:

- Use it dry to dust all surfaces, including mini-blinds, fans, lamps, railings, chandeliers, plants, cupboards, vents, fireplace screens and more!
- Before dusting electronics, turn them off for a while as the electrostatic charge they emit can hold dust to them, competing with the pull from the static electricity in the mitt.
- For heavily soiled surfaces, such as blinds and screens, moisten the mitt or use a damp Enviro Cloth and clean thoroughly.

- Clean by shaking vigorously outside or by using the Rubber Brush.
- Slightly dirty microfibre can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering.
- If the Dusting Mitt is used for heavy cleaning, wash using Norwex Ultra Power Plus, which contains no fillers, after each use. Do not use bleach, fabric softeners or dryer sheets.
- Rinse thoroughly after washing and air or machine dry.

Demo Tips:

- Point out that the Dusting Mitt works especially well for areas like railings, where greasy fingerprints attract dust. The Dusting Mitt removes not only the dust, but the grease and grime that attracts dust, too!

Did You Know?

- The original idea behind some traditional cleaning products was that dust would adhere to the sticky, oily chemicals in them. But while the soapy or oily solution may help pull dust into the cloth, it also remains behind on the surface, attracting even more dust. This not only increases the amount of dust on the surface, but it also necessitates more frequent dusting.

All Norwex Microfibre products carry a two-year warranty. Please visit Norwex.com for complete details.

*Contains BacLock, an antibacterial agent for self-cleansing purposes only. The agent is solely designed to inhibit bacterial odour, mould and/or mildew growth within the product.

COMPLEMENTARY PRODUCTS

- Enviro Cloth
- Spray Bottle
- Rubber Brush
- Kids Dust Mitt
