

Enviro Cloth

Item #: Pink-300001, Green-300002, Yellow-300003, Blue-300004

PROBLEM : Getting all the surfaces in your home as clean as possible, as quickly as possible, can be challenging. In addition, many of today's popular cleaners contain harsh chemicals that can make your family sick. And using paper towels to clean adds to the problem of overloaded landfills and deforestation.

SOLUTION : Clean more safely, quickly and thoroughly using super-absorbent Norwex Enviro Cloths. You'll save time, money and the environment using only water—reducing landfill waste, eliminating chemicals in waterways and protecting your family's health as you cut down on dust and reduce chemicals in your home!

Description:

The Norwex antibacterial Microfibre Enviro Cloth removes dust, dirt and grease from all washable surfaces using only water—no chemicals! Our super-absorbent Enviro Cloth picks up dust particles and traps them in the cloth until you rinse it out. Then BacLock™* in the cloth—our micro silver antibacterial agent—goes to work to self-purify and inhibit bacterial odours, mould and mildew growth within the cloth. 35cm x 35cm / 13.78" x 13.78"

Key Features:

- Contains approximately 2.9 million metres of super-absorbent Norwex Microfibre containing our exclusive BacLock* agent
- Can be used dry for dusting, or wet for general cleaning and heavily soiled areas
- Open spaces in the fibres created by the splitting process enable the cloth to lift away dust and dirt and absorb several times its own weight in water.
- Can be folded and refolded to create multiple surfaces for nonstop cleaning

Key Benefits:

- Cuts cleaning time in half by using only water
- No need for harmful chemicals
- Saves money by using only water
- Eliminates the need for paper towels, creating less waste and less paper dust in the home
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products
- Traps dust and grime in the cloth and leaves surfaces cleaner, so you won't have to clean as often
- Used dry for dusting, it creates static electricity that lifts the smallest particles of dust and dirt up into the cloth and prevents them from resettling on surfaces.
- Used damp for general cleaning and heavily soiled areas, it picks up everything using water. Cleaned surfaces become so clean that new dirt and dust do not return as quickly.
- Cleans any surface that would normally be cleaned with soap and water, including bathrooms (taps, sinks, baths, benches, toilets and more), walls, windows, floors, vehicles, toys, tools, kitchen appliances and surfaces, outdoor furniture and much more
- BacLock*, the micro silver agent in the cloth, goes to work with self-purification properties against mould, fungi and bacterial odour within 24 hours so that it is ready to use again.

How to Use:

- Use dry to attract dust and dirt particles, and wet to wipe away dirt and debris from all washable surfaces using only water.
- Fold the cloth so you have eight clean sides to work with. Wipe with even strokes.
- Slightly dirty microfibre can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering. Rinse thoroughly after washing and air or machine dry.
- Cloths that have been used for heavy cleaning should be washed using Norwex Ultra Power Plus, which contains no fillers, after each use. Do not use bleach, fabric softeners or dryer sheets.

Demo Tips:

- Spread a small amount of butter on a mirror at your party. Place wet, folded Enviro Cloth flat against surface to demonstrate how well it works to remove the butter in just a few swipes, without streaking.

Did You Know?

- Norwex Microfibre products are created in state-of-the-art factories with optimal working conditions.
- Most paper towels are bleached and then patterned with chemical dyes. Drying your hands with them can leave your skin rough and cracked.

All Norwex Microfibre products carry a two-year warranty. Please visit Norwex.com for complete details.

*Contains BacLock, an antibacterial agent for self-cleansing purposes only. The agent is solely designed to inhibit bacterial odour, mould and/or mildew growth within the product.

COMPLEMENTARY PRODUCTS

- Travel Pack
- Window Cloth
- Enviro towel
- Spray Bottle
- Kids Enviro Cloth
